JKTech Forms Peruvian Partnership

JKTech has announced its partnership with Peru based Transmin Metallurgical Consultants. Transmin has been a leader in metallurgical consulting expertise in Peru and neighbouring countries and now will provide JKTech consulting services to the region.

The partnership will provide the following services to the region:

- Comminution consulting
- Flotation consulting
- Training
- JKTech software and hardware products

Adam Johnston, Transmin's Chief Metallurgist says "Many of our clients typically have crushing, grinding or flotation problems. JKTech's suite of tools, services and experience at solving these problems are second to none. This is a fantastic opportunity for South American operations to use these cutting edge techniques with the additional benefits of local engineers offering fast bilingual support. The team at Transmin is ecstatic with the dynamic and cooperative integration that JKTech and Transmin are undertaking."

Peru is considered one of the major mining countries in the world, listed in the top ten producers for all of the main metals. JKTech currently has strong relationships with many of the major mining companies in the region including BHP Billiton, Barrick Gold, Freeport McMoran International, Xstrata and Anglo American among others.

About Transmin Metallurgical Consultants

Transmin Metallurgical Consultants have years of both operational and consulting experience in Peru. They are the ideal partner in South America for any kind of new project study, audit, optimisation or plant expansion project, offering international contacts and experience; bilingual in Spanish and English; knowledge of current best practices.
