JKTech continues its success in the 2008 Smart Awards

JKTech has continued its success in the Premier of Queensland's Smart Awards with the 4th consecutive year of being selected as a Finalist. JKTech's first success was in 2005 when it won the Mining & Mineral Processing category.

At the 2008 awards presentation held on Thursday the 31st July, JKTech was one of 15 applicants in the Services category, where the company promoted its consulting, training and laboratory services which are delivered to the global minerals industry. JKTech was selected as one of the 3 finalists, which was a great achievement.

This award gives recognition to the JK Centre for its success in innovative research, technology transfer and delivering value to its customers, the international minerals industry.

JKTech delivers a range of products to the minerals industry by way of specialist services (including consulting, training and laboratory testing as indicated above) together with innovative software solutions which include JKTech's flagship product, the Mineral Liberation Analyser (MLA) which continues to gain widespread industry support with a growing list of installations in Australia and around the globe.

JKTech's continuing success in the global market is providing a significant funding stream to the Julius Kruttschnitt Mineral Research Centre for ongoing research activities as well as the provision of a suite of new equipment for new and innovative research programs.

About JKTech

JKTech Pty Ltd is the technology transfer company for the Julius Kruttschnitt Mineral Research Centre (JKMRC) and other centres of the Sustainable Minerals Institute at The University of Queensland. Its role is to take viable research outcomes and transfer them to the international minerals industry. JKTech offers a range of innovative solutions for the minerals industry aimed at increasing productivity and metal recovery.

These specialist products and services include consulting, automated quantitative mineralogy (MLA), specialist software, specialist equipment, laboratory services and training courses.
